

Research and Development

UPES is pro-actively involved in research and development activities. A university grows faster only when it's faculty is involved in research deeply. UPES has many forums and 11 centres which are engaged exclusively in exploring, discovering and understanding various aspects of core sectors of chosen domain.

The research mission of UPES is to become a research-intensive university recognized for its positions at the forefront of setting and delivering research agenda, nationally and internationally across all disciplines in domains of choice.

UPES is focused on four strategic themes for intense research. They are Research Environment, International Excellence, Inter discipline Research and Knowledge Transfer. Under these broad themes eleven research centres are actively engaged in maintaining advanced research programs in the areas of:

- ✓ Nanoscience and Nanotechnology
- ✓ Environment & Energy
- ✓ Alternate Energy
- ✓ High performance Computation
- ✓ Automotive
- ✓ Excellence in Energy Economics
- ✓ Logistics and Supply chain
- ✓ Infrastructure and Project Financing
- ✓ Energy Law
- ✓ Research Quality and Productivity
- ✓ Developing Research in a competitive world.

Dr S J Chopra, Chancellor UPES, is the head of Research & Development centre of university and can be contacted at chancellor@upes.ac.in.
