

SDG13: CLIMATE ACTION

India's Climate Action Initiatives:

Renewable Energy Development: The Indian government focuses on renewable energy expansion, with targets to increase renewable capacity to reduce reliance on fossil fuels.

Afforestation and Green Initiatives: Efforts toward afforestation, promoting green cover, and conservation programs aim to reduce carbon emissions and enhance environmental sustainability.

International Commitments: India participates in global climate accords, showcasing its commitment to reducing emissions and combating climate change.

UPES University's Role in Climate Action:

Educational Integration: UPES integrates climate change education into its curriculum, educating students on the significance of sustainable practices and environmental conservation.

Research and Innovation: The university fosters research initiatives and projects focused on climate action, encouraging innovative solutions and technological advancements for a sustainable future.

Awareness and Campaigns: UPES conducts awareness campaigns, seminars, and workshops to engage students and the community in discussions on climate change, advocating for sustainable practices and environmental responsibility.

Future Objectives and Impact:

UPES University's endeavors in integrating climate change education, fostering research, and conducting awareness campaigns align with the government's initiatives for climate action. By continuing to elevate educational efforts, research initiatives, and public awareness, UPES plays a vital role in creating future environmental stewards committed to climate action.

In conclusion, India's national commitments and initiatives for climate action are supplemented by UPES University's educational and awareness campaigns, research innovations, and sustainable practices, collectively contributing to a concerted effort toward combatting climate change and preserving the environment.

Centre for Energy, Environment, and Sustainability Studies (CEESS)

<https://research.upes.ac.in/centre-for-energy-environment-and-sustainability-studies-ceess/>

Centre for Energy, Environment, and Sustainability Studies (CEESS) is a constituent think tank and research centre of excellence of School of Business, UPES. Its primary aim is to promote multidisciplinary research in areas of Economics, Environment, Energy, Globalization, Trade, Transport, Supply chain and Sustainable Development. Considering the Environmental policies of the country against thriving energy requirement and demand for infrastructure development in achieving high economic growth needs a balanced approach that can be derived from informed and effective research and development. Given what has been said, CEESS will be a major player to suggest policy reforms, as a result of its R&D that will help the policymakers to achieve sustainable development goals. Along with the vision of “Make in India” and “Atmanirbhar Bharat Abhiyan”, CEESS through its research and publication will assist policymakers to design their policies towards self-dependence, generation of employment and increasing value-addition with new initiatives to support both the manufacturing and services sectors and improving the ‘ease of doing business’ in the country.

The centre will promote research on issues pertaining to the economy, energy, environment, and society in the context of trade, transport and globalization with a specific focus on sustainable development. Centre will help suggest strategies for the implementation of energy, environmental and economic policies through R&D that will help policymakers to design effective policies for the country and the rest of the world.

BROAD RESEARCH THEMES

- The broad themes that will be primary areas of research at CEESS are:
- Energy Business: Renewable and Non-renewable energy business
- Business and Sustainable Development
- Environmental Economics and Energy
- Climate Change Economics and Policy
- Economics and Business Studies
- Transportation and Green Supply Chain Management
- Trade, Environment and Globalization
- Marketing Management and Energy Business
- Public Policy and Governance

FUNCTIONS OF THE CENTRE

- To promote Research and Development

- To promote international and national research collaborations
- To promote to submit joint funded research proposals
- To promote interdisciplinary and multidisciplinary research
- To conduct research workshops, seminars, conference, panel discussions, and guest/distinguished lectures
- To help in disseminating research output through publication, workshop, seminar etc.
- Building a network with industry, research think tank, ministry at the national and international level for joint research collaboration and funding.

STI Forum 2023

<https://twitter.com/DrSKrishnan/status/1654360058854080520>

Co-organised #STIForum 2023 event with @IndiaDST on Community Resilience Resource Centres for Post-Covid Socioeconomic Recovery. Impactful use cases by @wii_india @AmritaUni @UPESDehradun on community resilience.

@UNDPAccLabs

@Gina_labs

@RozitaSingh

@swetha_kolluri

@ErikaAntoine

Leveraging science, tech & innovation (#STI) for #ClimateResilience.

@IndiaDST & @UNDP

IN organized an event at #STI Forum on role of Community Resilience Resource Centres for SDGs & post COVID-19 recovery.

Over 100 participants from 40 countries🌐participated in the forum.

STI Forum 2023

Science, Tech & Innovation (#STI) are protecting communities 🧑🏫🧑🏫🧑🏫 from #ClimateChange.

Participated in an event on building community resilience by

@IndiaDST

&

@UNDP

IN at #STI Forum 2023 w/

@srivaric

Highlighted IN's use of frugal innovation 💡 for SDGs & post-pandemic recovery.

Project Swachhta

<https://www.upes.ac.in/social-impact/project-swachhta>

Aligned with the objectives of Swachh Bharat Mission to clean up streets, roads and public spaces in the cities, towns, urban and rural areas, Project Swachhta has evoked a sense of responsibility among the residents of Dehradun too. Cleanliness drives are being conducted at regular interval in

areas adjoining the campus. The local residents have also been sensitized to join the program. The aim is to instill the value of cleanliness among youth through voluntary work in order to take the cleanliness drive to the next level.

Zero-waste accessories and gifting solutions by UPES students

<https://blog.upes.ac.in/zero-waste-accessories-and-gifting-solutions-by-upes-students/>

PRADEEP JAGWAN · AUGUST 27, 2021

Team Kalakrit, comprising UPES School of Design students – Khyati Gupta, Ridhi Sood, and Kashish Kohli – make biodegradable and eco-friendly products under the guidance of their professor, Manas Ranjan Misra

During the festive season, we often come across gifts that are non-biodegradable and add to the carbon footprints. Team Kalakrit, comprising UPES School of Design students – Khyati Gupta, Ridhi Sood, and Kashish Kohli – have come up with a sustainable solution under the guidance of their professor, Manas Ranjan Misra.

These students have been making baked clay earrings, home décor items, therapeutic aromatic candles, and they even take customised orders for similar products. The products are organic, vegan, natural, sustainable, recycled, handmade, and biodegradable.

Says Khyati Gupta, “The idea came from the basic thought of ‘wastage and burden’ that a rakhi creates in its wake. Due to religious reasons, the thread cannot be disposed of in a bin and plastic is extremely harmful to nature. We can do a lot for our environment by making gifting options at home with eco-friendly materials instead of plastics, sparkles, beads, etc., caring for the environment, while retaining style, coolness, purpose, and fashion. Our products are zero-waste and come with zero-waste packaging.”

These products are zero-waste and come with zero-waste packaging

She further adds, “Through our products, we attempt to support the families who have lost their primary breadwinners due to Covid-19. We want to support underprivileged people by offering them employment opportunities. We also intend to conduct workshops in the less developed areas to create awareness of these handicrafts. We even want to expand our venture, targeting all the Indian festivals and events.”

Talking about the response to their products, Kashish Kohli says, “We are overwhelmed with the feedback that we got from our audience. Some people have even extolled our products as ‘revolutionary’. Some people also appreciated the finishing and design, and we are going to keep improving on it in all our upcoming projects. UPES provided us with a platform and audience who supported us throughout. We are even looking forward to getting registered with UCIE.”

The Health Effect of Air Pollution

<https://www.facebook.com/greenupupes/photos/a.1533322970215340/3125976874283267/>

Air pollution is causing way more damage to not only us but to our kids and animals. More and more people are suffering from air pollution. Kids with asthma have such a hard time breathing. They can't even play outside sometimes. Pollution has risen dramatically in past years affecting air pollution to cause the greenhouse effect and health problems, land pollution which causes harm to our environment, and water pollution which impairs water ecosystems. These obstacles cause harm and distress to plants, animals and humans. The rising of these various types of pollution is an everyday problem that affects our life and future and the environment day by day. So we should take our time and think about our actions before we do them. So help stop air pollution.

National Pollution Prevention Day

<https://www.facebook.com/greenupupes/photos/a.1533322970215340/3032183520329270/>

Every year, 2 December is observed as National Pollution Prevention Day in order to commemorate those who lost their lives in the Bhopal Gas Tragedy in 1984.

This day also aims to make people understand the need for preserving our natural resources.

National Pollution Prevention Day 2021 is observed with the theme of raising awareness around pollution along with urging the government to adopt policies that can help in reducing the effects of pollution.

On the National Pollution Prevention Day, it is our responsibility to avoid wastage of natural resources and prevent industrial pollution. We also need to focus on afforestation to combat the loss of green cover in the country.

Climate Change

<https://www.facebook.com/greenupupes/photos/a.1519593978254906/2999142333633389/>

Climate change is no longer some far-off problem; it is happening here; it is happening now."

- The Day recognizes the Earth and its ecosystems as humanity's common home and the need to protect her to enhance people's livelihoods, counteract climate change, and stop the collapse of biodiversity.

The theme for 2021 is Restore our Earth.

- Tropical forests are incredibly effective at storing carbon, providing at least a third of the mitigation action needed to prevent the worst climate change scenarios. Yet nature-based solutions receive only 3% of all climate funding.

- Natural climate solutions such as restoring degraded forests could create as many as 39 jobs per million dollars spent — that's a job-creation rate more than six times higher than the oil and gas industry.

SOME WAYS TO REDUCE CLIMATE CHANGE and not limited to this:-

1. Leave the car at home
2. Plant more trees
3. Eat less meat and dairy
4. Reduce water waste
5. Invest in energy-efficient appliances

Stop Global Warming

<https://www.facebook.com/greenupupes/photos/a.1533322970215340/2992838577597098/>

It's time we start taking care of our #Mother_Earth or else we and our generations will have to suffer.

Global warming is increasing rapidly all over the world.

Technology and urbanization are developing at a cost and i.e., our environment.

We have to start working on the concept of #Sustainable development

Socio-economic development should be sustainable.

Take a pledge to work for the environment and help this environment to grow better.

"We don't own the earth, we borrow it from our children"
