

# Annexure-I

**Title for paper submitted to Tech. Symposium 2020**

*First Author\**, *Second Author\*\**, *Third Author\*\**

\* Department, Institute Name

\*\* Department, Institute Name, if any

**Abstract-** An abstract is a brief summary of the research, and is often used to help the reader quickly ascertain the paper's purpose. When used, an abstract always appears at the beginning of a manuscript, acting as the point-of-entry for any given scientific paper.

**Keywords-** About four-five keywords arranged in alphabetical order, separated by commas.

## I. INTRODUCTION

This article guides a stepwise walkthrough by Experts for writing a successful journal or a research paper starting from inception of ideas till their publications. Research papers are highly recognized in scholar fraternity and form a core part of curriculum. Research scholars publish their research work in leading journals to complete their grades. In addition, the published research work also provides a big weight-age to get admissions in reputed varsity. Now, here we enlist the proven steps to publish the research paper in a journal.

Identify the constructs of a paper – Essentially a paper consists of five major sections. The number of pages may vary depending upon the topic of research work but generally comprises up to 5 to 7 pages. These are:

- 1) Abstract
- 2) Introduction
- 3) Research Elaborations
- 4) Results or Finding
- 5) Conclusions

## II. IDENTIFY, RESEARCH AND DESCRIBE IDEA

It's the foremost preliminary step for proceeding with any research work writing. While doing this go through a complete thought process of your research for it's viability by following means:

- 1) Read already published work in the same field.
- 2) Refer to established databases such as Science Direct, SCOPUS, WebofKnowledge or Goggle on the topic of your research work.
- 3) Understand the scientific terms and jargon related to your research work.

### **III. WRITE DOWN YOUR STUDIES AND FINDINGS**

Now it is the time to articulate the research work with ideas gathered in above steps by adopting any of below suitable approaches:

#### ***A. Bits and Pieces together***

In this approach combine all your researched information in form of a research paper. In this, researcher can take the reference of already accomplished work as a starting building block of its paper.

Jump Start

This approach works the best in guidance of fellow researchers. In this the authors continuously receives or asks inputs from their fellows. It enriches the information pool of your paper with expert comments or up gradations. And the researcher feels confident about their work and takes a jump to start the paper writing.

#### ***B. Use of Simulation software***

There are numbers of software available which can mimic the process involved in your research work and can produce the possible result. One of such type of software is Matlab. You can readily find Mfiles related to your research work on internet or in some cases these can require few modifications. Once these Mfiles are uploaded in software, you can get the simulated results of your paper and it eases the process of paper writing.

As by adopting the above practices all major constructs of a research paper can be written and together compiled to form a complete research ready for Peer review.

### **IV. GET PEER REVIEWED**

Here comes the most crucial step for your research publication. Ensure the drafted journal is critically reviewed by your peers or any subject matter experts. Always try to get maximum review comments even if you are well confident about your paper.

### **V. IMPROVEMENT AS PER REVIEWER COMMENTS**

Analyze and understand all the provided review comments thoroughly. Now make the required amendments in your paper. If you are not confident about any review comment, then don't forget to get clarity about that comment. And in some cases there could be chances where your paper receives number of critical remarks. In that cases don't get disheartened and try to improvise the maximum.

This completes the entire process required for widespread of research work on open front. Generally all International Journals are governed by an Intellectual body and they select the most suitable paper for publishing after a thorough analysis of submitted paper. Selected paper get published (online and printed) in their periodicals and get indexed by number of sources.

### **VI. CONCLUSION**

A conclusion section is not required. Although a conclusion may review the main points of the

paper, do not replicate the abstract as the conclusion. A conclusion might elaborate on the importance of the work or suggest applications and extensions.

## APPENDIX

Appendixes, if needed, appear before the acknowledgment.
