2025	School of Computer Science	9.1 Research on industry, innovation and infrastructure	SDG 3, SDG 9, SDG 17

About the event

Delegates from the University of Malta visited UPES to explore how artificial intelligence and health care can be brought together to address global challenges.

The discussions, which are at an exploratory stage, covered collaboration through IEEE conferences, joint research in health care with a focus on transcriptomics, optical character recognition and natural language processing for medical records, access to medical datasets for global interoperability, possible data collaboration with Malta's Ministry of Health, research internships and student exchanges, and the use of UPES faculty, students and AI infrastructure.
