SDG 9: INDUSTRY, INNOVATION AND INFRASTRUCTURE

University of Malta delegation on AI and health care

2025

Organised by	School of Computer Science
Date	2025
Report section	9.1 Research and technology for industry
Goals supported	SDG 3, SDG 9, SDG 17
Source	Event material shared by the organising school or unit (not published online)
Contents	Description of the event and photographs

This event report is compiled from material shared by the organising school or unit of UPES, as the event was not published online. Personal contact details are not included.

About the event

Delegates from the University of Malta visited UPES to explore how artificial intelligence and health care can be brought together to address global challenges.

The discussions, which are at an exploratory stage, covered collaboration through IEEE conferences, joint research in health care with a focus on transcriptomics, optical character recognition and natural language processing for medical records, access to medical datasets for global interoperability, possible data collaboration with Malta's Ministry of Health, research internships and student exchanges, and the use of UPES faculty, students and AI infrastructure.

Link to the report

This event supports section 9.1 Research and technology for industry of the UPES SDG 9 report.
